

# *DC Interaction Trigger Study*

*Nick Graf*  
*February 10, 2005*

# Goal

- Put DC interaction trigger module sums into offline data format
- 32 total that make up the DC interaction trigger
- For each one, plot as a function of time how many other modules fired the interaction trigger
- Do this for interaction events over the 80 ns window
- Look closely at the last 20ns

# Plots

Histograms accumulated over  
4593 interaction trigger events  
in run 12018
